INTRODUCTION

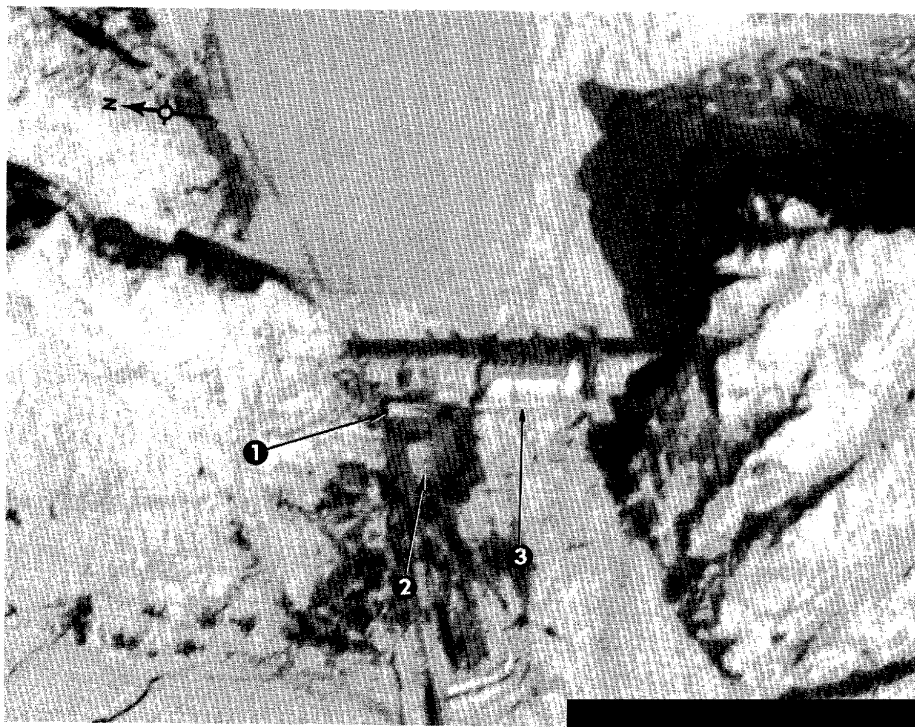

The Huan-jen Hydro Power Plant is located 2.5 nautical miles northeast of the center of Huan-jen.

BASIC DESCRIPTION

This facility is a consolidated hydro power plant with the powerhouse located at the foot of the dam. The number of turbogenerators cannot be determined and the switching yard and associated transmission equipment cannot be located because of poor-quality imagery.

The dam and powerhouse appear to be substantially complete; however, there has been no indication of plant operation on any of the available imagery. Minor turbulence resulting from stream flow over the spillway was observed on imagery.
